You'll find the work interesting and agreeable. Excellent opportunity; many employes' benefits. No experience necessary. We train you on the job. Good

Who asked you to pay for electricity used by people you never even heard of, a hundred or a thousand miles away?

Nobody! But you do help pay the bills for hundreds of thousands of favored people and hundreds of privileged businesses using electricity from certain federal power systems. Your taxes helped build those systems. Your taxes are used to subsidize service to their customers.

Who asked you to foot the bill so that this country could have socialized electricity?

Nobody! Yet, there are 72 federally owned power systems already in operation, under construction, or authorized at a total cost of over 10 billion dollars — and hundreds more are planned at a total cost of about 60 billion dollars. That's your money that's financing socialism!
