Gale Damages, United States, Delays Voyage

London, Dec. 17—(A)—The crack new American liner United States was damaged and other shipping imperiled today by furious winds buffeting the British Isles. There were gusts of more than 100 miles

The United States had just pulled away from the Southampton dock on a homeward voyage to New York when a gale caught her oadside and drove her back to the quay.

The port side of the ship's bridge jammed in between two high dockside cranes denting the bridge work and scraping paint off the observation deck.

The liner quickly worked loose and tugs resumed trying to get her out to sea. After an hour of tricky maneuvering in the gale force gusts, it was decided to wait until the wind died down. The liner was tied up at dockside and the 600 passengers aboard were told that sailing would be delayed.

The 1,800 ton Finnish freighter Solbritt was driven on to rocks off the Scotland isle of Arran, She was refloated five hours later by the Cylde tug Forrager.

The winds, ranging from gale to hurricane force, had coastal shipping scuttling for shelter, fesroads, and forced the cancellation

of some airline flights.
Inland, the gales tumbled pedestrians off their feet, disruptd telephone communications and brought chimney pots, slates and television aerials toppling off

At Morecambe, on the northwest 'coast, the town's 54 foot Christmas tree was blown down. Rail services at Prestwick, Scot-land, were halted when a two ton

Jets to Zoom At Kitty Hawk

Kitty Hawk, N. C., Dec. 17-(P) -Three Air Force Sabre jets were primed to slap historic Kill Devil nill with a triple sonic boom today, in ultra-modern tribute to the birthplace of aviation.

An F-86 speed run across the historic site of man's first powered flight also was on the program for the ceremony celebrating the 48th anniversary of the Wright brothers' takeoff in their flying machine at 31 miles per hour.
Only a month ago, in Southern

The sonic boom, an atmospheric phenomenon, gets its name from the two defeaning reports heard when a plane exceeds the speed of sound and when it drops below The three F-86s arranged to dive from 40,000 feet so they would crash through what is called the sonic barrier—760 miles an hour at sea level—at about 20,000 feet
—with plenty of room to pull out.

Conjecture on his successor has narrowed down pretty generally to two men. Both, already are on the university coaching roster.— They are Johnny Cherberg, freshman coach, and Neil (Skip) Stahley, Odell's backfield coach. Cherberg is considered to have the inside track.

Odell came to buy up his contract.

He blamed personal differences between himself and Cassill for his ouster and said there was no hope of a change in cassill's attitude.

It has been rumored for some time in Seattle that Cassill and Odell were not too friendly and dozens of reports that Odell would soon be fired have broken into the mews in the last few months. None, however, had exactly predicted the manner in which the break came.

Odell came to Washington in 1948 from Yale. His five season record at Washington is 23 wins,
