REFERENDUM URGED

Hartford, April 6—(P)—Joseph P. Cooney, attorney for the Hartford Roman Catholic Diocese, says a referendum on birth control should be held with a regular election to avoid creating an atmosphere of religious strife. A regular election, he said, would bring out a larger vote and a better expression of opinion while eliminating expensive and bitter campaigning to get people to the polls. In that way, he explained yesterday, the subject would not overshadow other issues and provide a field day for bigots.

THE CAR to watch is the one

Mrs. E. H. Cowles, tax collector, Foster street are the parents of a

## There's an old saying that a thing is worth what someone is willing to pay for it. Well, if you could tour the wholesale and retail used car auctions around the country if you could survey hundreds of used car lots you would discover that used Fords bring higher prices than any competitive make-and by substantial amounts.

HAT'S WHY we feel our '53 cars, the finest Ford has ever built, should not be compared with cars In the same price range. Not because our competitors don't do a good job-obviously they do-but because we feel Ford Cars have more in common with the highest priced automobiles. The similarities are far greater than the differences.

For example. Today, the most expensive cars in this country have V-type, 8-cylinder engines. Ford Cars have had this exact same type of engine for over 20 years. Ford has made more V-type, 8-cylinder engines than all other manufacturers combined and no other low-priced cat has a V-8 vet!

What's more astounding, the current Strato-Star V-8, a full 110-horsepower, high-compression V-8, delivers all its high-test performance on "regular" gas and sells for hundreds of dollars less than several other makers charge for a six-cylinder car. Now there's nothing wrong with a Six but they do cost less to make. Ford makes a Six-the most modern overhead valve Six in the industry. And if it's a sixinterest you to know that, inch for inch, very few cars costing are asked to pay. This is the miracle of Ford production. cylinder car you want, Ford has it and for less money than thousands of dollars more can beat Ford for window area. the V-8, which is as it should be.

What about ride? Here's another Ford similarity with high-priced cars . . . Riding Comfort. One of the misconceptions of automobile buyers for many years has been that weight-sheer weight-is what it takes to make a car ride well. But the railroads have disproved that, as any one who has ever ridden a modern, lightweight streamlined Pullman knows. It's how you use weight-how you spring and balance it that counts. Ford has found, for example, that you can make a 3000-pound car ride softer and hold the road better by far than many cars that weigh a full 1000 pounds more. In our '53 car, for example, front end road shock has been reduced up to 80%. We say it compares most favorably with the heaviest cars sold today. Chances are you could not tell the difference.

What about automatic transmissions? It would take the fingers of both hands to count the various kinds of automatic and semi-automatic transmissions on the market today. The one we offer is called Fordomatic. It is the most versatile on the market, it represents the most profound consideration of engine-to-wheel power transfer-and that it that the costliest cars are made of "better stuff." It's perfectly does the best job for our engines isn't even open to question. true that some high-priced cars have costlier upholstery and

It "shifts" better than you could shift by hand and it does it in such a way you hardly know it-automatically.

An interesting safety feature of Fordomatic is that forward and reverse positions are separated by a neutral position on the drive selector. It is "second nature" to handle, and what's more, with Fordomatic there is no time in the shifting when the car is not in perfect control. If you want to "rock" your car to get out of a snowdrift, you can. If you want an extra burst of speed you just step down on the gas and keep your hands on the wheel. In short, Fordomatic gives you the power you want, when you want it-automatically. We know for a fact that Fordoniatic is one reason why Fords bring more money on the used car market.

What you can see is also important. Here again Ford Cars lead not only in their price field but in the mediumand upper brackets as well. Ford visibility is Full-Circle Visibility, This means buge, curved unobstructed glass area. front and tear, plus side windows that allow all passengers what the hotels call "room with a view." And, it might

Appearance? A higher price, of course, does not make a car more beautiful. Conversely, beauty in a Ford comes "for free." Ford has found that it costs no more to develop abeautiful car than one that is less pleasing in appearance. You can drive up to the most exclusive doorways in the world and feel perfectly at home in your ford. It's done every day and if you don't believe it just stand in front of the Waldorf. for example, the next time you are in New York. Or the Mark Hopkins in San Francisco, Fords "belong", . . in exactly the same social category as the finest, one-of-kind creations. After all, a Ford is a custom creation multiplied.

What about running costs? Here's one place that Ford's advantages are obvious. For oil and gas economy Ford has the big cars whipped; Ford parts cost less. Ford service charges are less. Ford tire mileage is thousands of miles, greater. And, as-any C.P.A. who-looks into it will tell you, Ford depreciation is the lowest of any car on the market-

What are Fords made of? Some people have the idea

fittings. What Ford has is so good, both in durability and appearance, that you probably could not tell the difference. You might even prefer it, because of its better design and

Then there's the question of sheet metal. If you were to measure and analyze the sheet metal structure in the most expensive car, you most likely would find it identical in thickness to the corresponding panels in Ford. For the most part this applies to castings and forgings also. And here you have another reason why you can pay more but you can't buy better than Ford.

But what do you pay for a Ford? This is an interesting point. When designing and tooling up for a new model, Ford spends a great deal more money than the makers of the costliest cars. For example, the first dozen or so '53 cars cost just about \$62,000 a copy, apart from tooling! These cars are never sold-they're experimental models. Then when they are perfected and go into production Ford actually turns out a vastly superior car in every way for the low price you

After all, then, what is the difference between a Ford and the costliest cars?

In our opinion, the difference is largely a matter of dimensions, weight (and the power required to-move it) plus the distinction of owning-a car that not so many other people own. The desire for these things is understandable . . , and probably justified for people who are willing to pay the price

.As to comparing Ford with other cars in its price range, by all means do so if you wish. But, as we said before, you'll get a better picture of Ford value by comparing with cars that are most like Fords-those that are priced up to twice as much. As a matter of fact, we think you'll quickly begin comparing the other cars with Ford-because the 1953 Ford has really established the New Standard of the American Road.

PAGES FROM OUR

FOR THE YEAR 1952

The fourth Annual Report of Connecticut Medical Service is a record of progress and of hopes realized.

Most significant is the payment of nearly four and one-half million

Most significant is the payment of nearly four and one-half million

dollars in benefits to members during the year 1952. Of this total,

sometimes of the payment to physicians for "Service of the covering 48,000 claims was paid to physicians for "Service of the physician, over and beyond the income level stipulation of the contract, accepted the schedule of the income level stipulation of the contract, accepted the schedule of the payment as full compensation.

By giving this tangible support to the Doctors Plan the medical pro-fession has demonstrated its purpose to act voluntarily to preserve and extend a sound system of practice.

Total operating costs for the year have been kept just below nine per cent, a record that compares favorably with other Blue Shield plans and speaks eloquently of the advantages of our voluntary non-profit setup.

non-profit setup.

The sound guidance given by the Professional Policy Committee
in all medical relationships is proving invaluable to the Corporation.

Representing both the medical profession of Connecticut through the
Representing both the medical profession of Connecticut has fulConnecticut State Medical Society and the Corporation, it has fulfilled well its function of liaison and has promoted understanding
and good will.

During the period of our active life since our first member was enrolled as of April 1, 1949, we have paid out a total of over nine million dollars in benefits to the account of 159,000 claims by our members; we have extended coverage to in-hospital medical cases and have kept premiums at a low level.

It is a pleasure to record a word of appreciation to those who have earried so effectively the daily responsibilities of our corporate organization including particularly our General Manager, his staff and all others who have worked with them to make our services a matter of personal interest.
