It is Constant flitration of soap during the heavy soap cycle or cleaning cycle. The system does not allow the soap to redeposit or break down because the soap and solvent is filtered constantly in a separate system during the cleaning cycle.

Your clothes can never get gray or doil looking. This is the secret of the UNIT CLEANING colors, the pure whites, and the
fluffy clean feel to the hand the UNIT CLEANING gives. Every
ounce of soil is removed and trapped in the separate soap filter
never to redeposit again on your clothes.
