Turkey agreed to release the arms being provided by the United States after Nehru appealed to President Kennedy for military aid.

Three days after Nehru asked to release the acknowledgement of the coming arms assistance.

"We are grateful for the U.S. government's sympathy and support and their offer to help us in the procurement of supplies required for our defense efforts," a spokesman said.

Terms on which the American arms would not be arranged. The same goes for a private plane that crashed on a trip from Canada.

UNITED NATIONS, N. Y. (AP)—Fidel Castro's annoy-ance over being bypassed by Soviet Premier Khrushchev caused the Cuban leader to reject U.N. inspection of Soviet missile removal, a high U.N. source said today.

This source said Castro was aggrieved because Khrushchev had not consulted him before agreeing with President Kennedy that U.N. inspectors could be sent to Cuba to verify the dismantling of Soviet missiles.

These disclosures came as Acting Secretary-General U Thant plunged into a new series of diplomatic talks in an effort to get the Cuban peace effort back on the track. Informed sources said Castro had given him an outright rejection at their first meeting in Havana on Tuesday, but had

been much more agreeable on Wednesday. The belief was expressed in high U.N. circles that Castro might accept the U.N. inspection plan after his present mood

Diplomatic informants in Washington said Castro had delivered a bitter tirade in his talks with Thant and accused. Khrushchev of having sold him down the river. A spokesman for Thant said this was "completely unfounded." The spokesman also denied Washington reports saying Thant had had a most unpleasant trip to Cuba.

The secretary-general's first appointment today was with the current president of the Security Council, Mahmoud Riad of the United Arab Republic; and with Ghana's council dele-

gate. Alex Quaison-Sackey. He also had appointments with Cuba's newly appointed U.N. delegate, Carlos Lechuga, who flew back Wednesday. night from Havana. Lechuga arranged to present his credentials, but it was possible also that he and Thant would deal

with the Cuban situation. U.S. Ambassador Adlai E. Stevenson had an afternoon appointment to see Thant.

About as hour later, around 9 a.m., the in-formation was in the President's Later that day, Kennedy examined the photographs himself. His first step was to order a redoubling of reconnaissance ove the suspicious points in Cuba. In the next few days, "reccy" pilots shot more than 32,000 feet of film over the suspicious sites They recorded swift and baleful

changes.
Soon, the evidence became is overtible. Soviet missi bases were rapidly rising near the cities of Guanajay Remedios, San Cristobal and Sagua La Gran-de. There were some eight or 10 bases with about four launchers at each base.
Soviet light bombers, the Byushin 28, also were marshalling on shin 25, also were marshalling on the island.

In his report to the nation of Oct. 22, Kennedy called this "the Soviet military buildup" on Cuba He described two distinct types of installation, one for a medium rocket with a range of more than 1,000 miles, the second, 'not yet completed," for intermediate mis-siles with double this range—and both capable of carrying nuclea He also mentioned the bombers.

He also mentioned the bombers.
Kennedy spoke of "this urgent transformation of Cuba into an important strategic base by the presence of these large, long-range and clearly offensive weapons." He then announced the "quarantine" on further shipments of offensive weapons to Cuba and warned: "And these actions may be onl the beginning."
The week that preceded this de cision is pretty much of a blur to men who participated in it. One describes it as a "nightmare." They cannot now remember clearly where they were or what they did on a given day. They can provide only a sketchy picture of Kennedy during this high-energy, high-tension week icy. It is his typical reaction when e is under pressure. As additional evidence of the

threat from Cuba rapidly mount-ed, they were briefed at least once a day, sometimes twice. Be tween briefings, they gathered in the State Department, examining the terrible potentialities, matching ideas on actions to recommend to the President. until late at night. Through the week of Oct. 21-27. McNamara siept in his office. Kennedy did not leave the White House until last Sunday morning when went to church. Two things, they say, surprised them most in this period—the speed of the Soviet work on the bases, and the fact that Soviet Premier Khrushchev "would do anything so dangerous."

One said it appeared that, "only four or five days" elapsed between the detection of the first scars, in the earth and the rise of the medium-range missile sites. None, he said, was yet opera-tional. They calculated the 200mile-range missile, distinguished by different markings from the mediums, would become opera-

tional by Dec. 1.

As for Khrushchev's motive in

attempting to supplement the armed might of the Soviet Union with a base in the Western Hemis-

with a base in the Western Hemisphere, they are only theories.

The prevailing one is, "if we didn't do anything about Cuba, we wouldn't do anything about Berlin or any other point."

Or, as another put it, "If you're not going to react when he (Khrushchev) has something like this pointed right at your guts, when are you going to react?"

The question may remain long unanswered.

Oct. 16, when Kennedy first was advised of the new evidence, the Soviet threat existed and was rapidly increasing in magnitude.

The question was: What to do about it?

A furnace, which heats the ground level store and the two apartments above, was at first suspected, but today's inspections shows it was probably not the cause of the blast.

Whatever its source, the fire started quickly in the rear section of the store, below ground level, and burned up along side the chimney. Chief Mason pointed out where sections of wallboard had been removed on both residential floors of the building, next to the chimney. The wood beneath was burned away.

Flames reached the attic of the building before the firemen had the fire under control!

Hose Companies 1 and 2 responded to an alarm. Before the fire was out, about 50 firemen were involved.

Chief Mason said that while damage to the building is heavy, no estimate can yet be made. Much of the fire occurred behind walls, where its effects will not have to go by is the description valls, where its effects will not e evident until the innards of the building are exposed.

There was also widespread smoke and water damage.

The two apartments in the building, occupied by Clifford and Edna Ulm and Robert and Marjorie Reynolds, must be vacated while the building is repaired. A message from the Treasury of a free people

How to help give a new birth to freedom

Sometimes it's not easy to recognize a message of free-

In September, 1787, the framers of the U.S. Constitution released it to the States for ratification. Two States ok'd the document in a few weeks.

But it took until May, 1790—three years later—before the new nation was in accord on its basic law.

One of the strongest documents for freedom available t you today is a United States Savings Bond.

By buying Savings Bonds you help build peace-keeping machinery. You help keep the wheels of our government turning smoothly. You help carry the message of freedom to hopeful people all over the world.

At the same time, your Bond money grows fast to in-

crease your living standard and personal security—a goal that free people seem to have a knack for reaching.

All of which points pretty strongly to buying Savings Bonds today-at your bank or on the payroll savings plan

(Of course the decision is wholly up to you . . . another nice thing about being free.)
