Air Force pilots pressed their war against the Hanoi area with unrelenting fury today, bombing a key railway and highway bridge across the Red River four miles from the center of the North Vietnamese capital. The steel and concrete bridge carries the only rail line between Red China and the North Vietnamese capital, the U.S. Command said. U.S. spokesmen were unable to give an immediate assessment of damage to the bridge. They said it was a steel and concrete structure with five spans, 738 feet long and 20 feet wide, and with the center span is movable to allow passage of Othec Air Force raiders from Thailand made the second attack in two days of an electrical transformer site seven miles
